

Nonsense Safari

Once I went on a safari
It very much did not make sense
All the animals I saw
Were complete and utter nonsense
When I saw them I was speechless
My jaw dropped down to the ground

A sniraffe right in front of me
What that is I do not know
A snake headed giraffe with a snake tail in tow
A fleleigh jumped past my face
I tried to swat it but it flew
An urchiduck was in a pond
The strangest creature yet
A ball of spikes for its head
Something that I won't forget

As I looked towards the pond
A jellycrab came out
With wobbly crab legs
And pincers on its head
Then I noticed some slow movement
I turned around to see a tiny whale?
Its body slithering on the ground
Perhaps it was a swhale?

That was such a weird safari
I never experienced that before
But it does make me wonder
If I go back will I see more?
