

Slug vs Spider

One sunny day, there was a very, very, very kind slug. He helped to make a slimy path for other minibeasts and he made a lovely bridge that went across a red ant road. One day there was a sudden scream of "help!" Mr slug didn't know what it was at first but in about twenty seconds he knew what it was. It was a baby slug that was stuck on a house gutter. Mr slug rushed up the gutter and said to the baby slug "hop on my back," The baby slug did what he was told and they rushed back down the gutter.

Meanwhile, there was an extremely horrible spider who had a grim guinea pig army. The Other day, one of Mr Slug's friends got caught by him. The guinea pig army must be horrible mr slug thought "horrible horrible horrible"

One terrible day, Mr slug and his bee got caught by the grim guinea pig army. First, Mr slug and his brilliant bee tried to sting the spider but he was too tough and his guinea pig army just nibbled back. "Well that's not very nice. Is it?" Groaned Mr slug. Next the buzzy bee tried to buzz them away but that just made them laugh, oh dear. Last, Mr slug and his bee shut the spider and his guinea pig army in the kitchen but Mr slug couldn't find the key.

An hour later, Mr slug and his brilliant bee were back at home. They were thinking and thinking and thinking, and suddenly Mr slug had a brilliant idea. "Hop in the helicopter." Mr slug shouted excitedly When they got there Mr slug told the bee what the plan was: Use Mr slug's slime to stick the horrible spider and his guinea pig army upside down. When they had done it Mr slug screamed with delight !IT HAD WORKED!!!

The following day, Mr slug slimed through the woods when he got to the little minibeast village. All the minibeasts were out sunbathing. They all cheered as he walked in. All the minibeasts started asking him questions. When they had calmed down, Mr slug declared there would be a BBQ. They all cheered. An hour later the BBQ was ready. There was a dead bird that a cat had killed, and they all lived happily ever after.

The end
